

2021 TEXAS RECYCLING SUMMIT Future Leader Scholarship

Calling all future leaders! Are you passionate about creating a more environmentally sustainable future? Would you like to learn more about the recycling industry in Texas? Apply today for a 2021 STAR Future Leader Scholarship to the 23rd Annual Texas Recycling Summit.

Summit has been Texas' premier recycling conference for 23 years, offering professional development, exclusive networking opportunities, and cutting-edge updates for and from the recycling industry of Texas.

Each year, STAR's sustaining Mission Partners contribute to the Future Leader Scholarship Fund, which allows exceptional Texas students access to Summit. This year, we have opened more than 50 virtual scholarships!

Scholarships include full access to Summit 2021's virtual events from Oct 4-6, 2021.

Applications are open to all students in good academic standing currently enrolled in a degree-seeking program in the state of Texas for the Fall 2021 semester.

Attending Summit will give you an opportunity to meet and learn from experts and innovators in the recycling industry from across Texas and around the world, as well as network with fellow like-minded students in Texas. You will learn about important legislation that impacts recycling, circular economies, cutting-edge technologies, private-public partnerships, food waste and insecurity, and more.

Whether you are just starting to explore issues of sustainability and recycling in Texas and beyond or if you have already been exploring these topics for a while, we invite you to come start or continue your journey to create a more sustainable Texas with us at this year's summit!

Applications will be approved based on merit as received and will close Sept 30th, 2021, or when all available seats have been taken.
